

Gov4git

Practical governance for decentralized open-source communities

github.com/gov4git

Petar Maymounkov

Motivation and constraints

Goal Bootstrap and grow an open-source community transparently and pluralistically.

**Responsibilities of
governance**

polls
for prioritizing work
issues, pull requests

referendums
for approving
merge to branch

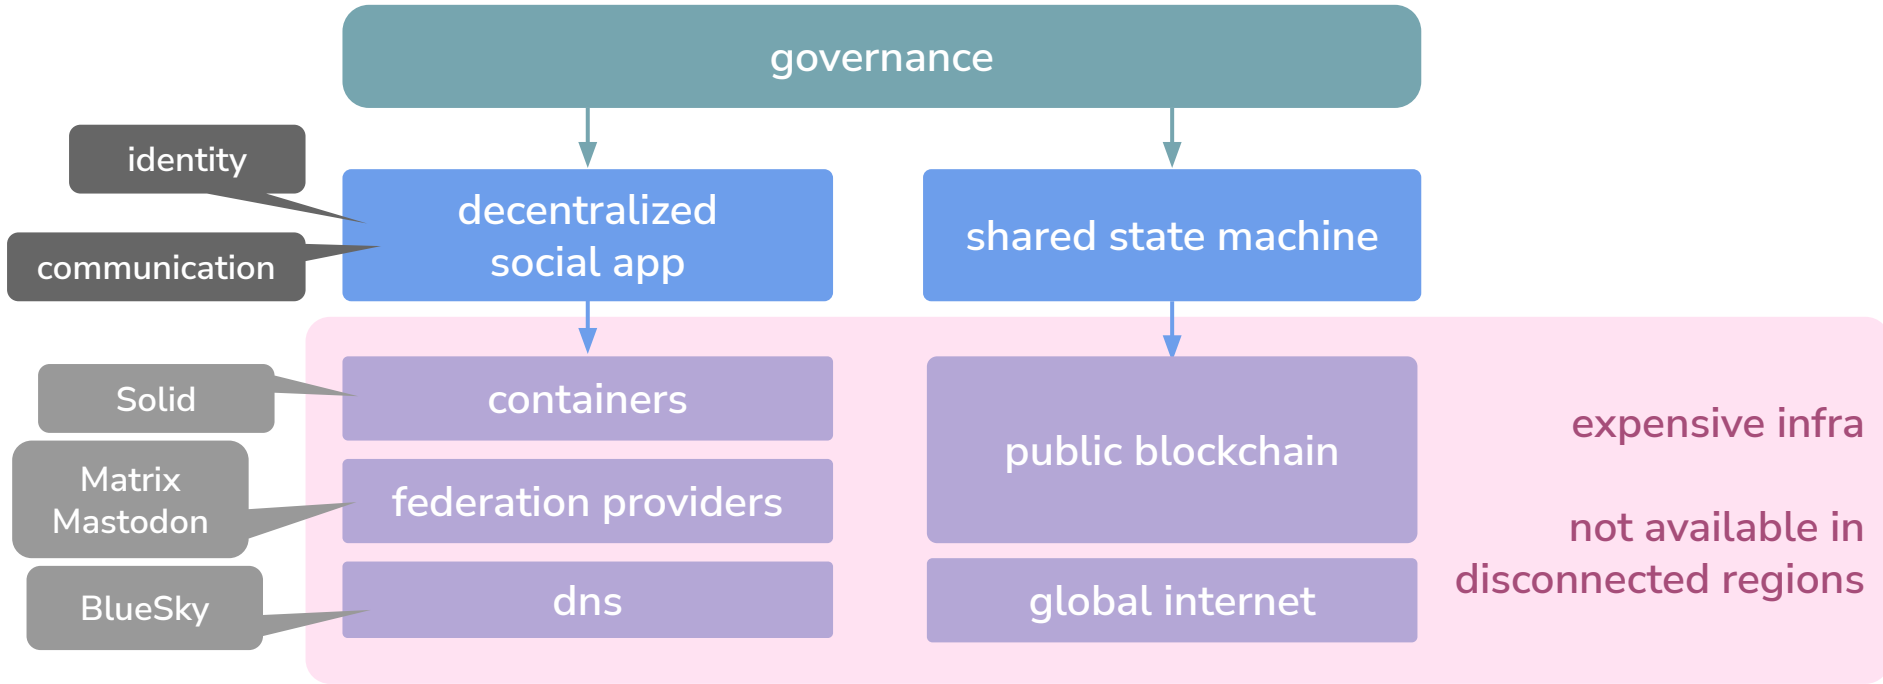

**Real-world
considerations**

large communities
member rights

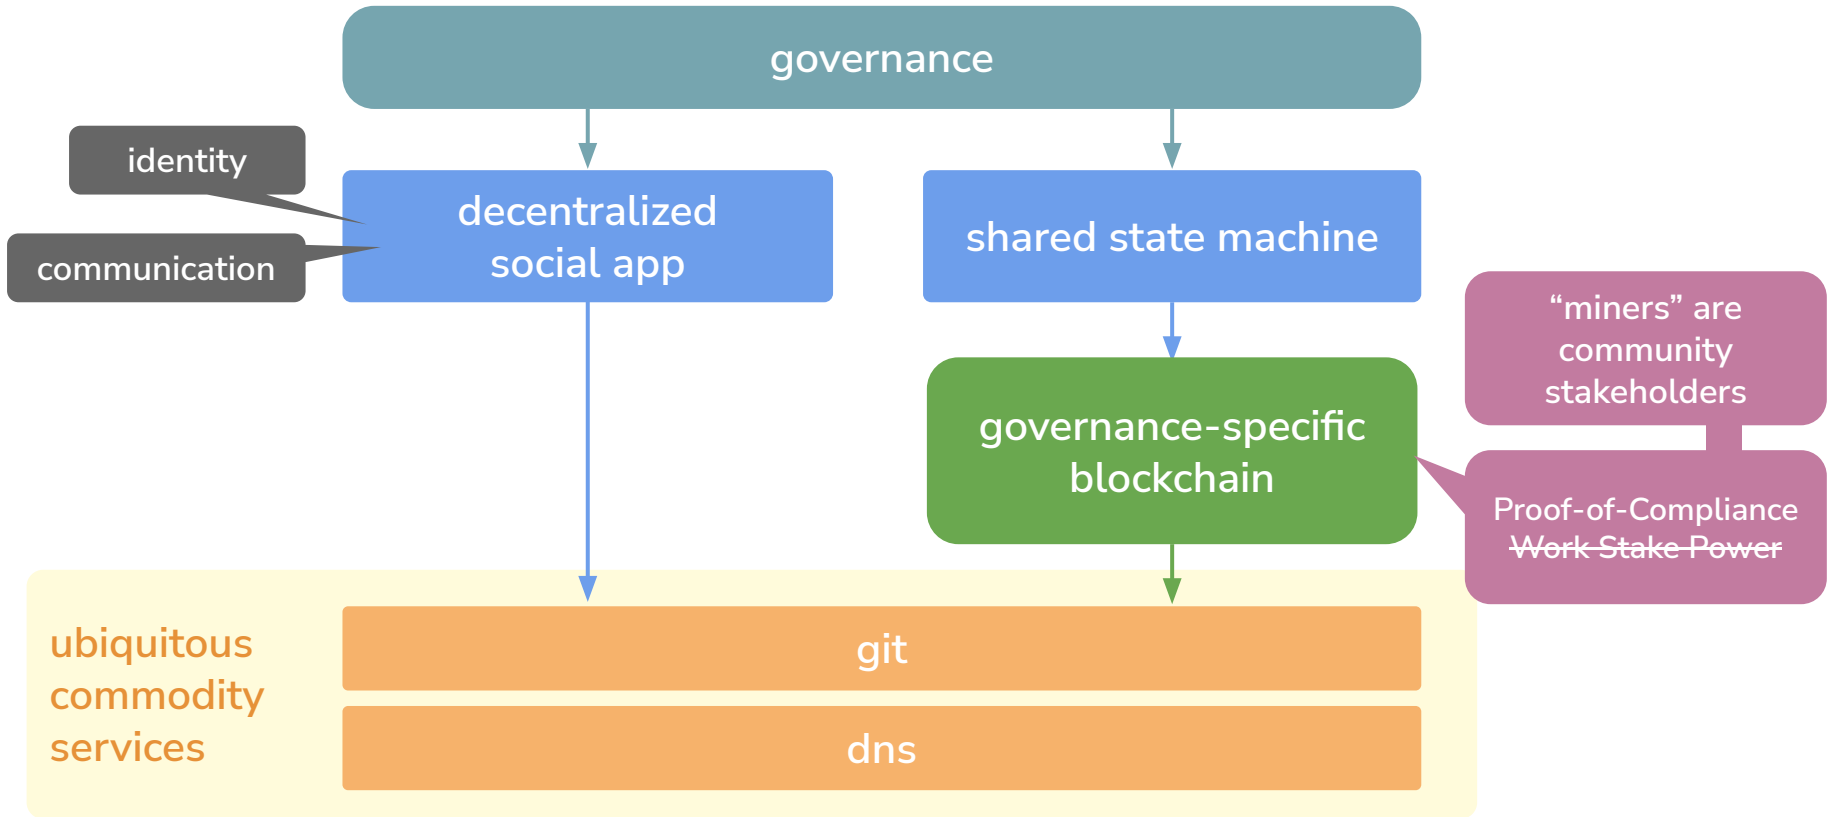

disconnected regions
war, disaster, firewall

commodity infra
home pc + net

Web3 “textbook” approach

Decentralized governance over git

Thank you!
